ZEN GUARD

DATABASE, INFRASTRUCTURE AND APPLICATION SUPERVISION MODULE.

Based on innovative technologies, Zen Conseil has developped its own DBMS supervision tool.

Its objective is simple: to give you the best detailed vision in real time of your information system while enhancing your data.

Presentation of the tool

ZenGuard is the key element of our services offers (database & infrastructure monitoring ; Enterprise workflow monitoring, proactive support) but it is also really useful for our consultant when doing technical audit.

Despite a detailed supervision with hundreds of key indicators and metrics collected, this tool allows to access to a very modular alert system in case of incident.

Database, infrastructure, application, they all can be monitored with one single tool.

Zen Conseil expertise

A technology developed by Zen Conseil.

We took open source tools that were already efficient and we have added our expertise with a datamodel and a collection flow made by Zen Conseil.

Our teams bring on monthly basis updates and new functionalities to allow ZenGuard to evolve and to offer you more and more services.

In addition to giving more visibility, ZenGuard is also capable of giving you short term trends on KPI of your choice based on the historical stocked.

Zenguard's Benefits

To allow your teams to anticipate problematics that you may face in the future.

Finally, in addition to the tool, our consultants have developed a client interface that is simple and user - friendly in order to allow you to exploit and manage at best the resources of ZenGuard.

→ Personalized Metrics and dashboard creation

→ A higher level of performance than the others monitoring tools on the market.

→ Monthly Automatic reporting or on demand

→ Efficient technologies in the service of Zen Conseil supervision.
